

Installation Guide

Model: ZL600

Lock Body: European Standard Mortise Lock Case

Version: 1.0

English

Cautions

1. A new lock is defined as always in open mode until it is locked once by a IC S50/S70 card.
2. Please register an authorized card, a time sync card, and a room card initially for the new lock.
3. The lock is equipped with keys for manual unlocking. Remove the keys from the package and keep them in a safe place.
4. To power on the lock, four alkaline AAA batteries (not included) are required. Non-alkaline and rechargeable batteries ARE NOT RECOMMENDED.
5. Do not remove the batteries when the lock is in working state.
6. When the battery power is low, the lock will beep to remind the user to replace the batteries. Make sure not to mix up the polarities while replacing the batteries.
7. Avoid contact with corrosive substances. Do not hang any object on the handle.
8. The built-in software manages the operation of access cards. Please refer the software user manual.
9. For further queries, please contact the seller.

Warning:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF Radiation Exposure Statement:

- This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
- This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment.

IMPORTANT! Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
