

BioTime Cloud

Cloud-based Time and Attendance Management Software

- Multiple Location Attendance Management
- High Level of Security with AWS Cloud Storage
- Easy Setup and Cost Effective

BioTimeCloud is a cloud-based time attendance solution that lets you manage and organize your workforce effectively wherever you are without having any physical server.

With a powerful AWS database storage, you can make sure that all your data are protected. It ensures the availability and confidentiality of your data and provides end-to-end privacy and security. The solution comes with a mobile application that is developed to allow employees to report their attendance using real-time location tracking. With its user-friendly interface, collecting and organizing employee attendance data has never been easier.

Features

Real-Time Location Tracking

Know the exact current location of an employee who works in the field with the use of GPS mobile tracking system.

Multiple Location Assignment

HR or supervisor can assign an employee to work and report attendance from multiple workplaces and field locations.

Attendance Policies Management

HR or supervisor can set pay code, overtime rules, holidays, shift schedules and cycles for employee policy management.

Daily Activity Monitoring

Manage daily timecards and attendance summaries of employees to boost productivity and calculate payroll efficiently.

Attendance Approvals

Employees can apply for manual log, leave, and overtime through mobile application which will go through HR approval process.

Mobile Application and Geofencing

Report attendance logs based on assigned workplace with optional employee reporting zone limitation.

Leave Management

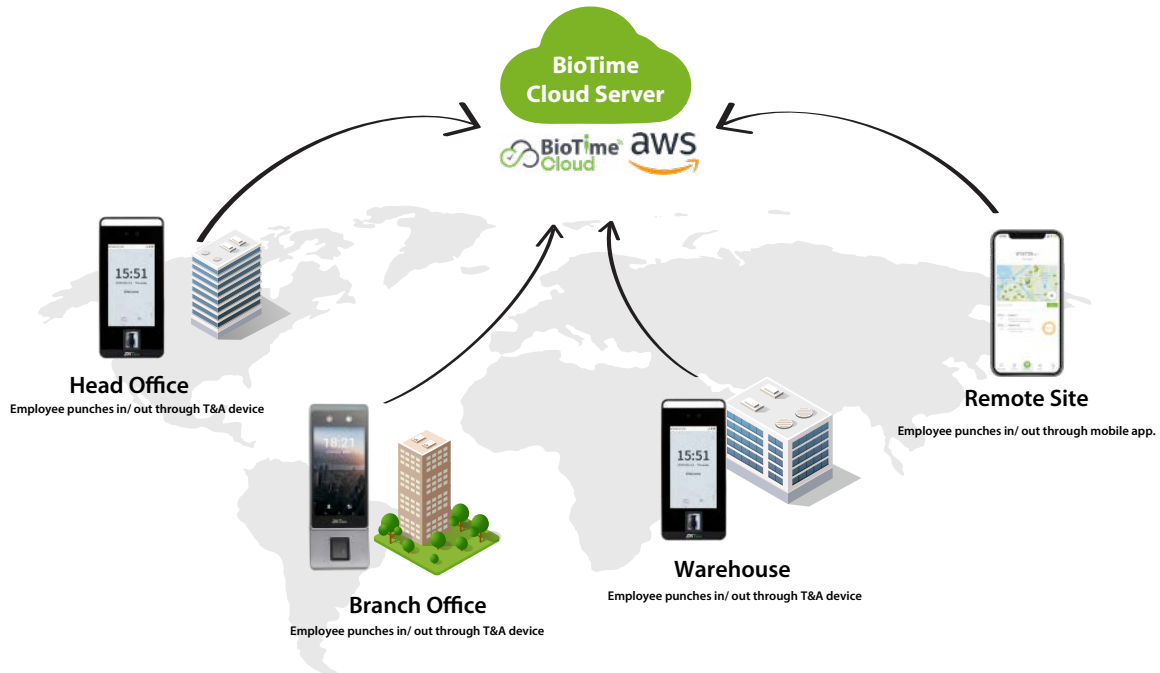

Assign and monitor available annual leave, sick leave, etc. that is available for an employee.

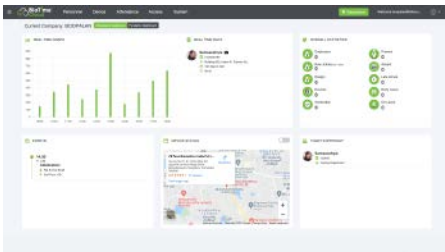

Real-Time Attendance Report Calculation

Generate attendance reports directly and export in a ready-to- print PDF or Excel format.

Multiple Location Attendance Management

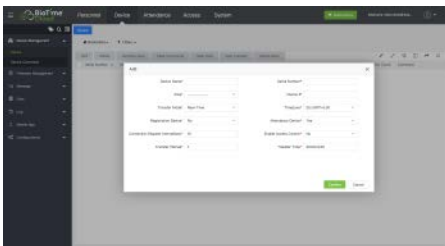

Features that Makes Our Solution Effective

Access Time Attendance Data Through Web or Mobile Access

Our BioTimeCloud solution comes with full time attendance and simple access control functions allows you to manage and monitor the daily activity of your employees. Multiple authorized HR personnel can also access accurate data at any time and anywhere through cloud.

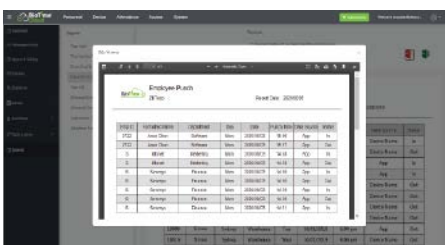

Real-Time Employee Location Tracking

Assign your employees to work in multiple workplaces and field locations and monitor them through BioTimeCloud. Know their exact location real-time when they punch in the mobile application.

Attendance Policies Management

Set pay code, overtime rules, holidays, shift schedules, and cycles for your employees. Monitor your employees timecards shown in the daily activity dashboard and mobile application.

Time and Attendance Reports Generation

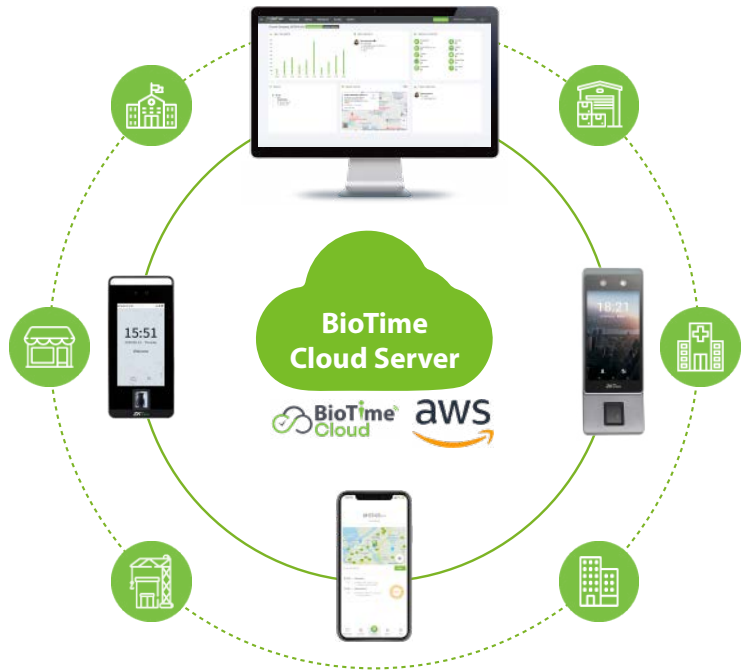

Generate your employees attendance reports directly without a need of waiting. With BioTimeCloud, you can generate reports in real-time and export in ready-to-print PDF or Excel format.

Organize your workforce effectively wherever you are

ZKTeco created and developed a perfect solution for small to large scale companies. We are known to have developed web-based centralized attendance management and access control systems which can help Human Resource handle employee attendance records and calculate salaries based on the works rendered conveniently.

High-level Security - AWD Cloud Storage

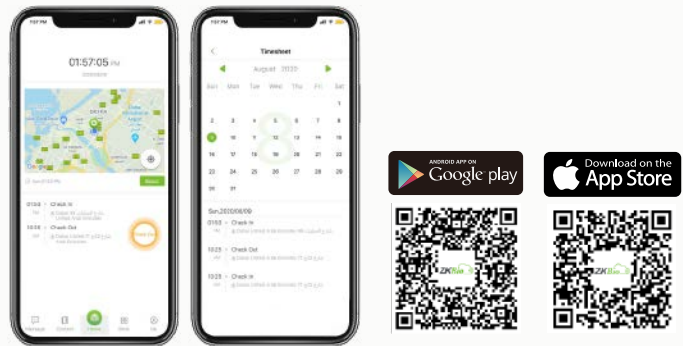

Powered by Amazon Web Services, you can make sure that all your data are protected. It ensures the availability and confidentiality of your data and provides end-to-end privacy and security.
