

ProMA Series

Outdoor Weatherproof Access Control Terminal

Robust Design with Full Spectrum of Authentication Options

Compatible with

 **ZKBio CVSecurity**

ProMA is a high-end outdoor multi-biometric access control standalone terminal built with ultra-robust aluminum alloy casted casing.

ProMA series enhance its protection level to reach water and dust proof standard (IP66) and vandal proof standard (IK07). There are three models under ProMA series, which have equipped with different authentication combinations, facial recognition, fingerprint recognition and multi-tech RFID recognition, named as ProMA-QR (Face+QR code+RFID), ProMA-RF (Face+RFID), ProMA (Face+Fingerprint+RFID). Additionally, the latest touchless palm recognition is also available in this terminal as an option feature.

Despite its compact size, these terminal's authentication template capacity is top notch in the industry, which supports up to 10,000 fingerprint / 30,000 face / 5,000 palm / 50,000 RFID. Besides, the authentication speed of these terminals is stunning, facial recognition speed of less than 0.3 sec per face, touchless palm recognition performed in 0.35 per hand, and completed RFID recognition in 0.2 sec, all these incredible features making them a perfect choice for most application scenes.

The series supports the ZKTeco PUSH communication protocol and fully integrates with ZKBio CVSecurity and the latest hybrid biometric technology.
